

# STONEBRIDGE

Retained by Dundee Developments to design a new neighbourhood, Crosby Hanna & Associates provided a vision for a new residential / mixed use community in southeast Saskatoon. The conceptual model for the community is based on a relatively high density "Village Centre" serving as a hub, with linkages to a series of integrated development areas that provide a wide range of choice for residential surrounding and housing form. The concept plan includes a "Special Use Park" for the purpose of commemorating and protecting the Moose Jaw Historic Trail - an important heritage resource.
