

## WANUSKEWIN HERITAGE PARK

SASKATOON 1994

This major First Nations culture heritage park, immediately north of Saskatoon, is of national significance. Particular attention has been devoted to ensuring that development presents an appropriate cultural and environmental image. Specific features of the 136ha development include thematic entrance development, amphitheatre, activity area, extensive trail network including creek crossings, various interpretive stations/site exhibits (including a Medicine Wheel) and a major interpretive/administration centre and archaeological laboratory. The firm's extended and ongoing involvement includes resource management planning, program and functional planning, site planning and design, landscape architecture, site restoration, coordination with architectural, engineering and exhibit design consultants and contract administration services.
