

24 Hour Lake Excavation

Crosby Hanna was part of a multi-disciplinary team charged with the task of deepening and revitalizing Wascana Lake. Crosby Hanna developed landscape plans for each of the areas

affected by the lake excavation project. 1.4million m3 of excavated fill was placed, graded and seeded to enlarge and enhance Wascana Hill, to create stabilization toe berms, create

Toe Berm after Hydroseeding

Broad Street Pedestrian Underpass

Albert Street Promenade Viewpoint

Discovery Island, develop the Broad Street pedestrian underpass, create Pine Island from an abandoned bridge abutment, expand Spruce and Willow Islands, and develop the Albert Street Promenade. Crosby Hanna worked closely with the engineering team to design new shorelines, guardrails, a major boardwalk, bridges and viewpoints.
